

To the FCC Chairman and Commissioners:

I respectfully request that you carefully consider specific action with regard to the National Association of Broadcasters (NAB) petition 04-160. I pay a certain fee for XM Satellite radio service, because my area does not have diversity in radio broadcasting. Utilizing XM satellite radio service I am able to listen to radio broadcasts that are pleasing to me and I have also been afforded the opportunity of being exposed to new genres of music and other types of entertainment.

In addition to music, comedy, talk and other types of radio broadcasts XM also delivers weather and traffic for certain cities in the U.S. This service is part of the price that I pay for XM. While traffic and weather isn't given for my city or even my state I am sure that it is useful for some living in or traveling to larger cities. This is invaluable information and should be left as part of the XM broadcast. Please reject the above mentioned petition.

Thank you in advance.
